The mobility service provider DKV Mobility is launching DKV APP&GO today. Via the app, users can conveniently pay their fuel bill at the pump and no longer have to stand in line at the store. In addition to saving time, the app minimizes unnecessary contacts at the gas station and thus the risk of infection.

"We are very proud that we were able to develop a mobile fueling solution with our partner PACE within a very short time," says Marco van Kalleveen, CEO of DKV Mobility. "This not only saves time when refueling, but it also reduces the risk of infection." DKV has been a minority shareholder in PACE since September 2020. Technologically, the app is based on PACE's Connected Fueling platform. "The neutral platform is open to all petroleum companies, POS system providers and OEMs and is on its way to becoming the central technology for the digitalization of the petroleum industry in Europe," explains Dr. Martin Kern, co-managing director at PACE Telematics. At the market launch, DKV APP&GO is available at over 500 gas stations in Germany, including those of the Q1 brand. In the medium term, all 63,000 gas stations from the DKV supply network are to be connected.

## **DKV Euro Service**

DKV Euro Service has been one of the leading mobility service providers for the logistics and transport industry for over 85 years. From cashless route delivery at over 200,000 cross-brand acceptance points to toll collection and VAT reimbursement, DKV offers a comprehensive range of services for optimizing and managing vehicle fleets throughout Europe. DKV Euro Service is part of the DKV MOBILITY SERVICES Group with over 1,200 employees. In 2019, the group achieved a transaction volume of €9.9 billion and operated in 45 countries. Currently, more than 5.1 million DKV CARDS and on-board units are in use by over 250,000 contractual partners. In 2020, the DKV CARD was named the best brand in the fuel and service card category for the 16th year in a row.

## **PACE Telematics**

PACE Telematics, based in Karlsruhe, Germany, is one of the technologically leading providers in the field of connected car services and automotive cloud platforms. PACE's central product is the [connectedfueling.com](https://connectedfueling.com) platform, which enables mobile payment at the gas station using various payment methods. In addition to the Connected Fueling marketplace, PACE operates a manufacturer-independent, cloud-based automotive big data and IoT platform.
