

Another partner acquired for the Connected Fueling network

Mobile payment with Connected Fueling from PACE now available at all RHV gas stations

Karlsruhe, August 16th, 2021

The PACE Connected Fueling network is extended by the gas stations of Raiffeisen Handels- und Vermittlungsgesellschaft mbH Eichenzell. The rollout was successfully completed and customers can now refuel at 17 RHV Raiffeisen service stations and pay with their smartphone directly at the fuel pump with Connected Fueling.

With RHV Raiffeisen, PACE gains another partner who is convinced of the simple mobile-payment process and the independent Connected Fueling Platform. The Connected Fueling platform already supports the integration with various POS system providers, including Ratio Elektronik GmbH, which are used by RHV. The integration of RHV service stations was therefore possible and quickly implemented without any further development effort.

The customer can store various payment options in the app and all receipts are automatically saved in the app after each refueling. The inconvenience of collecting paper receipts is completely eliminated for the customer. RHV thus offers customers digital fuel management free of charge.

Reinhard Kirchner, managing director RHV Raiffeisen: "Digitalization is constantly being driven forward at RHV and through the cooperation with PACE Telematics, RHV is laying the foundation for the digital future in the service station sector."

More options for drivers

Connected Fueling offers drivers the opportunity to pay quickly and securely at the pump. Not only are various payment options available, such as credit card, PayPal, Apple Pay, and giro pay, the open system also allows app providers to easily integrate it into their own app. In addition to the PACE Drive app, which—aside from payment—also allows users to search for gas stations and compare prices, DKV customers can also use the DKV APP&GO to pay digitally with the DKV Card. Both apps can be downloaded free of charge from the respective app stores.

Using Connected Fueling is quite simple: as soon as a customer drives up to a supported gas station, he or she is notified of the mobile payment option in the app and can call up the station's available gas

pumps. The customer then selects the pump on the display, fills up and pays conveniently via smartphone. The receipt is then displayed and saved directly on the customer's device. Pre-authorization and activation of automatic fuel dispensers, as is the case at some RHV gas stations, is also already possible and implemented.

About RHV

RHV-Raiffeisen Handels- und Vermittlungsgesellschaft mbH- is a medium-sized, independent energy trading company based in Eichenzell in the Rhön Industrial Park, Germany. In addition to selling heating oil, wood pellets, diesel fuel and AdBlue, RHV operates 17 of its own gas stations. RHV will continue to drive digitalization in the gas station business, and soon the company's own RHV fuel card will be digitalized. You can find more information about the company in the RHV APP or at www.raiffeisen-rhv.de

About Connected Fueling

The open Connected Fueling platform enables mobile payments directly at the pump through a unified, cost-saving connection of all partners to the cloud system of connectedfueling.com. The independent platform is open to all petroleum companies and POS system providers. In addition, connectedfueling.com offers flexible interfaces and easy-to-integrate SDKs to automotive manufacturers and app providers in order to integrate the mobile payment function into their systems. For more information, please visit www.connectedfueling.com.

About PACE

PACE Telematics, based in Karlsruhe, Germany, is one of the technologically leading providers in the field of Connected Car Services and automotive cloud platforms. In addition to the Connected Fueling marketplace, PACE operates a manufacturer-independent, cloud-based automotive Big Data and IoT platform. With its technology, the Karlsruhe-based startup offers Connected Car solutions for B2B and private customers. For end customers, the Connected Fueling technology can be used with the free PACE Drive app. For more information, visit drive.pace.car.
